Symptoms of coronavirus (COVID-19)

If your child has symptoms of coronavirus, however mild, they must stay at home from when their symptoms started and get a test, you and anyone you live with must self-isolate until you get your result.

If someone your child lives with has symptoms, everyone must stay at home and not leave the house for 10 days.

The most important symptoms of coronavirus are recent onset of any of the following:

- a new continuous cough
- a high temperature
- a loss of, or change in, your normal sense of taste or smell

For most people, coronavirus will be a mild illness. However, if you have any of the symptoms above you must stay at home and arrange to have a test to see if you have COVID-19.

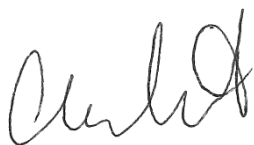

Full government [guidance for households with possible coronavirus infections is available online.](#)

Emergency contact details

Please ensure your details are up-to-date and make sure that someone is available to answer a call in the event of an emergency.

Please note that these plans could change in line with ongoing government guidance.
